PROFESSIONAL SUMMARY

Detail-oriented Full Stack Developer and final-year Information Technology student with proven experience designing, building, and deploying responsive web applications and data-driven dashboards. Skilled in Python backend frameworks, relational and NoSQL databases, and interactive frontend visualizations. Passionate about translating complex business requirements into scalable, user-focused digital solutions.

TECHNICAL SKILLS

- Languages: Python, JavaScript (ES6+), Java, SQL, HTML5, CSS3
 - Frameworks & Libraries: Flask, Bootstrap 5, Chart.js, Jinja2
 - Databases & Cloud: Firebase Firestore, MySQL
 - Tools & Platforms: Git, GitHub, Render, VS Code, Android Studio
-

TECHNICAL PROJECTS

Mrs. Brave's Cake Shop Management System | *Flask, Firebase, JavaScript, Bootstrap, Render*

Full Stack Developer | 2026 – Present

- Led the building and design of the full-stack web application, handling the cloud deployment and automatic updates directly on Render.
 - Managed the admin dashboard, building real-time tracking for shop orders, inventory, sales data, and interactive business charts.
 - Integrated an AI chatbot for FAQs with a live chat escalation feature to the owner, using a responsive design that works smoothly on all devices.
-

Personal Portfolio Website | *Flask, HTML5, CSS3, JavaScript, Render*

Designer & Developer | 2026

- Conceptualized and built a clean, modern digital portfolio to host technical projects and career accomplishments.
 - Optimized asset delivery, performance, and SEO scores using clean semantic HTML and modular CSS rulesets.
-
